

Pipeline Association of Missouri

MISSOURI PIPELINE OPERATORS

*Natural Gas Gathering
Liquid Gas Transmission
Natural Gas Transmission
Hazardous Liquid Transmission
Natural Gas Distribution
Crude Oil*

Our purpose:

Promote pipeline safety through communication and education of emergency responders.

Our goal:

To create a bridge between emergency responders and pipeline operators.

Pipeline Association of Missouri

About Us

The Pipeline Association of Missouri (PAM) is comprised of approximately 27 pipeline companies that have come together in a collaborative effort to promote pipeline safety and emphasize damage prevention throughout the state of Missouri.

Organized in 2005, PAM includes liquid and gas pipeline operators, storage field, tank farm operators and municipalities....and we need you!

Our members work together to keep Missouri informed and aware of the pipelines running throughout the state. Here are just some of the benefits of membership:

- Consistent and effective pipeline safety training programs to hundreds of first responder & public official agencies every year in Missouri - in person and online
- Collaborative marketing and outreach programs making it more affordable for all members
- Inclusion in PAM website for pipeline safety meetings
- Use of online program documentation system that assists members during state and federal audits
- Access for Emergency Responders to Utilize Online Training Center
- State wide local meeting

Membership in the PAM is easy and any PAM member is eager to share the benefits of joining!

Join the PAM today!

Becoming a member is easy!

- Contact the PAM's program managers noted below.
 - Review and learn about all the PAM does for its member companies.
 - Complete a program selection form (PSF).
 - Begin the process of building an operator page (if applicable).
 - Attend the program that is in your area.
 - Participate in PAM's quarterly membership meetings.
-
